## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 24-28 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,810,528 to Chatani.

As concerns claims 24, 25 and 28, means for processing movement data (120); means for receiving the performance information file (124); means for composing the performance (138); program display means for displaying (80); wherein the performance information file includes the sequence information that constitutes the performance and the flag information that defines movements or expressions of characters that appear in the sequence information ().

As concerns claim 26, adapted to transmit contributed text of users (140). Note it has been held that the recitation that an element is "adapted to" perform a function is not a positive limitation but only requires the ability to so perform. It does not constitute a limitation in any patentable sense. In re Hutchison, 69 USPQ 138.

As concerns claim 27, displaying the series of performances after the reception of the performance information file is completed (inherent that data cannot be displayed until after it has been received and processed). Note it has been held that the recitation that an element is "adapted to" perform a function is not a positive limitation but only requires the ability to so

perform. It does not constitute a limitation in any patentable sense. In re Hutchison, 69 USPQ 138.

### ***Response to Arguments***

3. Applicant's arguments filed January 31, 2007 have been fully considered but they are not persuasive.

The applicant argues Chatani does not identically disclose the means for composing the performance. The claims are given their broadest reasonable interpretation and as such Chatani discloses this limitation (see above rejection).

The applicant argues element 138 of Chatani does not perform the selecting process as claimed. Chatani discloses a means for composing, wherein in order for the processor to process the data it must first be selected.

The applicant argues Chatani does not identically disclose flag information or character expressions as recited in the claims. The claims are given their broadest reasonable interpretation and as such Chatani discloses this limitation (see above rejection). The flag information and character expressions are just data. Chatani discloses data which is equated with "flag information" and "character expressions" when playing the game. See also column 1 lines 50-65.
